## ABOUT US

Leber is a leading manufacturer of outdoor playgrounds for parks and residential areas.

We have been supplying top-quality products for more than 14 years.

Individual, prompt, and attentive customer service allows the company to increase its market share each year and spread it widely, confirming its reputation as a responsible partner for outdoor playground equipment in play areas, parks, and educational institutions.

Our equipment is designed for public areas with a large flow of children, for intensive loads, such as parks, housing, educational institutions, etc. It is built to prioritize safety and durability, ensuring that children can enjoy their playtime without any risks or limitations.

We are always in search of the best materials for our equipment and find it all over the world. The Leber outdoor playgrounds feature the highest quality materials from Russia, Asia, China, Turkey and other countries.

## DEALER NETWORK

The Leber's dealer network extends to many countries, providing you with high-quality products, careful support, and professional service, wherever you may be. Out of our desire to be closer to our customers, we are actively developing our dealer network, expanding the geography of our presence.

Our dealers in Russia, Georgia, the United Arab Emirates, Saudi Arabia, Kazakhstan, Uzbekistan and Armenia will be glad to help you make the right choice and provide all the necessary information about our equipment.

## WARRANTY

We offer excellent warranty conditions

### 7 years

Racks and supporting structures made of galvanized and stainless steel; stainless fasteners.

### 5 years

Treated wood pillars; High-pressure laminate (HPL) parts; monolithic polycarbonate.

### 2 years

Moving plastic and metal parts; rubber parts; springs and mechanical systems; plastic slides, rope elements.

### 1 year

Electronic components of the equipment; other materials not specified in this warranty.

This warranty only applies to Leber products. The warranty period is counted from the date of purchase of the equipment by the customer and corresponds to the above terms. The warranty covers defects in the product due to manufacturing or material quality.

The warranty does not cover defects in the product resulting from non-compliance with transportation, storage, installation and operation rules, misuse of the product, changes in the product design by the consumer without the manufacturer's approval, acts of vandalism, natural wear and tear of paint coatings.

The warranty period for the surface finish of metal parts installed within a 500-meter radius from the sea coast or with the use of sand as a coating, is reduced to half of the standard warranty period.

## THE MATERIALS WE USE ARE ADAPTED TO THE TROPICAL DESERT CLIMATE

### HPL

HPL is ideal for use on children's playgrounds. Its features make it an excellent material for creating a safe and durable environment for kids.

High moisture resistance of HPL provides protection from corrosion, preventing premature deterioration.

In addition, HPL offers significant resistance to damage from ultraviolet rays that prevents material from fading and the deterioration of the appearance.

HPL has a high temperature resistance that allows it to withstand extreme temperatures without harm to its properties.

### ASPEN TIMBER

Aspen timber has special features that make it ideal for use in children's play equipment. Aspen is known for its high strength and durability in extreme climatic conditions, making it an excellent choice for use in children's playground equipment.

With a pleasant light shade and soft texture, aspen creates a pleasing aesthetic impression. All this adds beauty and naturalness to children's playgrounds, making them attractive to children and adults.

## GALVANIZED METAL

In our products we use exclusively galvanized steel. Its preparation for painting includes many processes, among which we use shot blasting and the application of zinc-containing primer.

According to research, the chances of corrosion in material treated in this way are virtually eliminated.

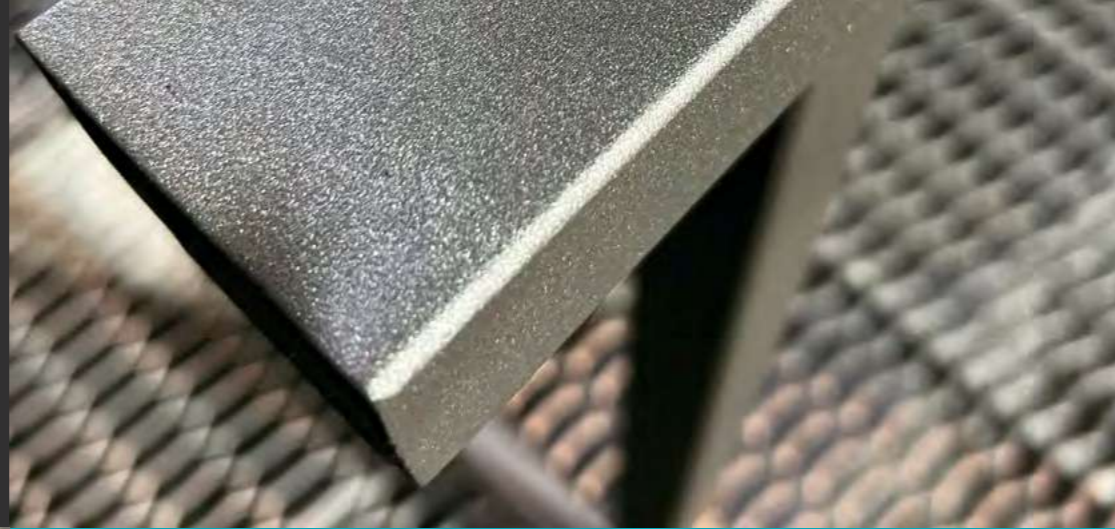

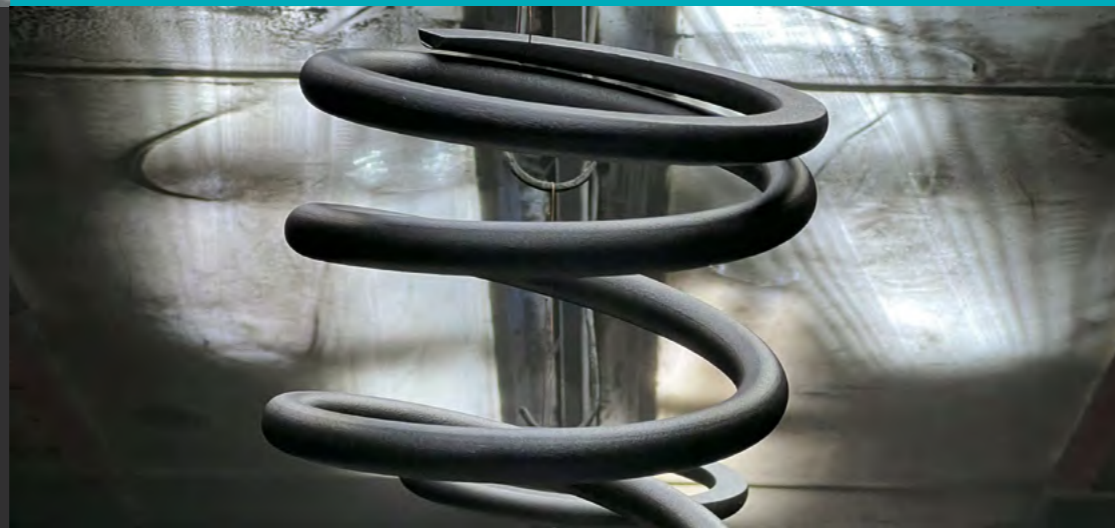

**Durability:** Galvanized metal is very durable and can withstand the intense weather conditions that are often seen in tropical climates, including high temperatures, strong sunlight, and heavy rains.

**Safety:** Galvanized metal is safe and non-toxic. It doesn't flake or chip easily, it doesn't produce harmful substances when exposed to sunlight, rain, or high temperatures.

Galvanized metal has a number of advantages:

**Corrosion Resistance:** Galvanized metal has a protective zinc coating that prevents rust and significantly prolongs the service life of the material. This zinc coating acts as a physical barrier preventing moisture from entering the metal underneath.

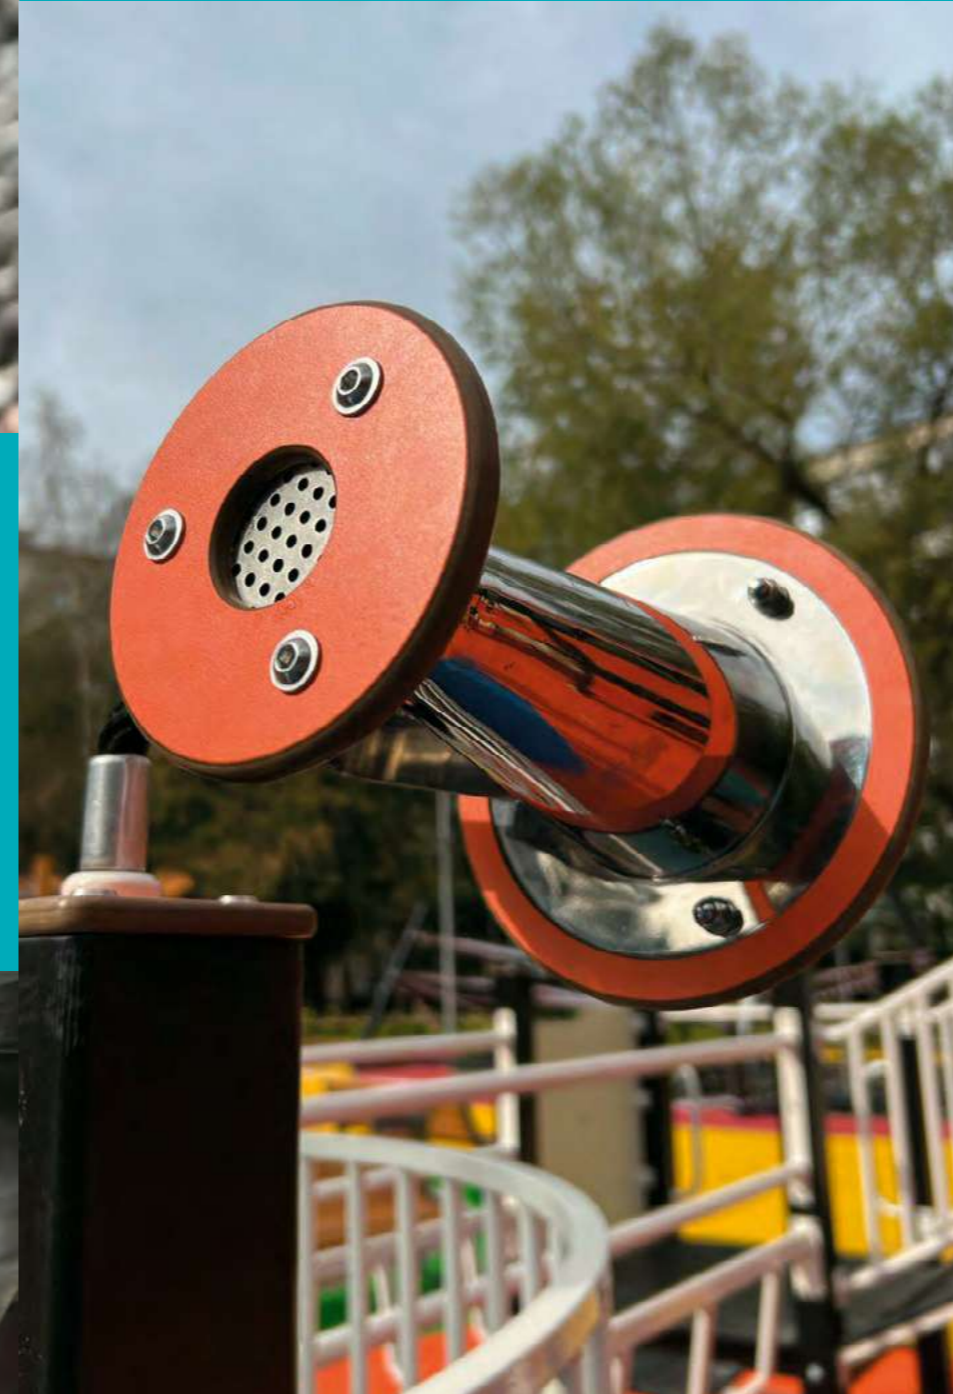

## STAINLESS STEEL

Using stainless steel in children's play equipment has several advantages.

**High Corrosion Resistance:** Stainless steel contains chromium, which gives it protection against rust and corrosion. This is especially important in a climate, where high humidity and salty air can lead to quick deterioration of metal structures

**Thermal Stability:** Stainless steel has good thermal stability, does not deform at high temperatures, and retains physical characteristics. This is important for play equipment as it needs to remain safe and functional even under extreme weather conditions.

**Health and Safety of Children:** Stainless steel is a hypoallergenic material, it does not cause skin irritation or allergic reactions. It also does not emit toxic substances or odors.

## STAINLESS FASTENERS

Stainless steel fasteners are recommended for use in equipment for children's playgrounds for several important reasons:

### Durability:

Stainless steel is known for its strength and durability. Children's playground equipment can undergo a lot of wear and tear, and therefore it needs to be made with materials that can withstand this over time.

### Safety:

Since stainless steel fasteners do not corrode, the risk of injuries caused by sharp, rusted edges is reduced. Safety is the most important aspect for playgrounds.

### Aesthetics:

Stainless steel fasteners retain their shine even in humid conditions, helping playground equipment maintain a clean and attractive appearance over many years.

### Corrosion resistance:

The main advantage of using stainless steel fasteners is their excellent resistance to corrosion.
